Conditioning sets
Successful-source
and the source's
own attack succeeds
N = 2,831 / 3,814
Both-correct
and source correct on
the clean image
N = 7,061
Target-correct
target correct on
the clean image
N = 7,353 / 8,579
Unconditioned
every test image
N = 10,000
terraces: nesting only, not area-proportional;
N: mean over the three seed pairs
Measured asymmetry
n = 3 seed pairs
Unconditioned
